Period for Reply

A SHORTENED STATUTORY PERIOD FOR REPLY IS SET TO EXPIRE 3 MONTH(S) FROM THE MAILING DATE OF THIS COMMUNICATION.

- Extensions of time may be available under the provisions of 37 CFR 1.136(a). In no event, however, may a reply be timely filed after SIX (6) MONTHS from the mailing date of this communication.
- If the period for reply specified above is less than thirty (30) days, a reply within the statutory minimum of thirty (30) days will be considered timely.
- If NO period for reply is specified above, the maximum statutory period will apply and will expire SIX (6) MONTHS from the mailing date of this communication.
- Failure to reply within the set or extended period for reply will, by statute, cause the application to become ABANDONED (35 U.S.C. § 133).
- Any reply received by the Office later than three months after the mailing date of this communication, even if timely filed, may reduce any earned patent term adjustment. See 37 CFR 1.704(b).

The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:

(a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negated by the manner in which the invention was made.

Claims 1-21 are rejected under 35 U.S.C. 103(a) as being unpatentable over Anderson et al.

Anderson et al disclose coating compositions suitable as clear coats on a variety of substrates including wood. These compositions are taught as comprising urethane polymers which may be combined with acrylic polymers. The further incorporation of fumed alumina is taught at column 68, lines 34-40.

While the reference does not teach by example a composition comprising each and every component of the rejected claims, the reference is seen as providing sufficient guidance to render obvious to one of ordinary skill in the art applicants claimed coating compositions.

Claims 1-19 are rejected under 35 U.S.C. 103(a) as being unpatentable over Kwan et al.

Kwan et al disclose coating compositions comprising urethane or acrylic polymers, fumed alumina and aqueous or organic solvents. While the reference does not explicitly disclose the combination of urethane and acrylic polymers, this combination is seen as obvious since the two are taught as equally suitable.
